WhatsDown Release 3

Functional - release notes

Messaging

- Select messages, forward them to several chats at once, or delete them.
- Message Info shows delivery and read times for every recipient.
- Links in messages are clickable and days are separated in the history.
- Group chat previews show who sent the last message.

Organisation

- Coloured chat folders with avatar clusters and drag-and-drop.
- Add to Folder from the chat context menu, or select several chats.
- Read All marks every chat as read in one click.

Media

- In-window photo, video and PDF viewers.
- Zoom, rotate and pan photos; page through PDF documents.
- Reply, forward, locate in chat, or open in another application.
- Voice messages support seeking, pause and resume.
- Pitch-preserving playback at 0.5x, 1x, 1.5x and 2x.

Notifications

- Sender avatars for direct messages, group avatars for groups.
- Clicking a notification opens the relevant chat.

Keyboard shortcuts

- Navigate between chats without leaving the keyboard.
- Format selected text as bold, italic, strikethrough or code.
- Press Up to edit the last message you sent.
- Send files straight from the composer.
- Open the shortcut overview from the keyboard or from Settings.

Thank you!

Try all of this right here in Demo Mode - no WhatsApp account required.
